

Mick Gould Commercials Ltd is one of the South East's leading commercial vehicle recovery and repair companies. Our distinct recovery trucks are a familiar sight on roads throughout the UK and in Europe.

Our commercial vehicle roadside assistance and recovery services are available 24 hours a day, 365 days a year from our two bases in the south east, Clacket Lane Service Station on the M25 and head offices at Flimwell, East Sussex. We have a reputation for responding quickly and efficiently to emergency recovery and roadside assistance calls. Our main aim is helping our clients to get back on the road as quickly as we can thereby saving time and minimizing costly penalties for late or non delivery.

Our fleet of recovery vehicles range from the smaller trucks capable of carrying cars to the larger HGV lifting and towing trucks. Our experienced staff have been able to recover vehicles from the most awkward locations, operating with sensitivity in difficult and sometimes tragic situations.

In addition to vehicle recovery and repair, our modern workshops at our home base on the A21 at Flimwell, East Sussex offers commercial vehicle servicing and repairs, including a body shop and paint shop. We also offer a tachograph and road speed limiter installation and repair service.

Although we are an approved Renault Trucks service center, we service and repair all makes and model of commercial vehicles.

Whatever your commercial vehicle repair, recovery or roadside assistance needs – and wherever the problem is, call us on 01580 879333 for an immediate response
