---

Things are looking better..

The heads arrived a couple of weeks ago courtesy of RFD developments. We now have some extra cfm on the heads and combined with our new cam that was spec'd by DCB enterprises we should have plenty more HP for 2009. We also have a GZ motorsports Vac pump on the engine again... The engine is now back in the car and at Nigels for a couple of alterations and upgrades we planned on.

More news soon...
